Hello!

## Welcome to the Tile Giant 2021 Trend Edit

2020 was a year most of us would like to put behind us, so we're very excited to be looking at the year ahead.

We've compiled the interior trends that are going to be popular this year and added suggestions on how you can include them in your home.

As we are spending a lot more time indoors, it's important now more than ever to be happy with the space you're in. We hope you enjoy this edit and be sure to let us know on social media which trends you'd like to adopt in your home!

*Love, The Tile Giant Team*

*Down to earth*

As we've all been spending a lot more time at home, it's important to make your space as peaceful and zen as possible. Bringing in touches of nature can make a house feel more like a home and restore harmony in the most chaotic of times.

Tying in with one of the colours of the year, Aegean Teal, blue sky thinking is another simple way of bringing calm into your home. Mainly inspired by the rippling ocean waves and the sky on a bright summer's day, it's good to appreciate the small but important things in life.

Japan is a known inspiration hub whether it's fashion, food or design. Japanese style develops around clean and uncluttered living, order and a love for natural beauty. The use of simplistic colours, textures and open space is something that can be adapted into many of our homes.

# You're making me blush

Blush Pink a.k.a  
Millennial Pink has been  
making its way into  
homes over the last few  
years and what an  
impact it can make!  
Not one for the shy and  
retiring, pink can be a fun  
and exciting way to bring  
colour  
into your home.  
Give it a go, we dare you...

Metro Blush Pink

longer 10x30cm format. Use individually or

Milan Rose

The Milan collection is also available in different shades. We love this rich moss green.

Cottagecore is a cultural movement with the concept of a simple, self-sufficient life inspired by the rural countryside. In 2021, the trend is making its way into both fashion and interior. It's about time you escaped to the country.

Metallic colourways seem to be everywhere you look when it comes to home design. You can find metallic accents in wallpapers, fabrics, furniture and decorative details in gold, copper and chrome. Try to choose one and stick to it for maximum payoff.

*The Cosmos Copper tiles are suitable for use on walls and floors throughout your home and will create an impact in kitchens & bathrooms alike.*

Slate Rock Black

Commix Grey  
60cmx60cm

Born in the 1970s, the industrial design trend can be tricky to get right. For a softer take try combining distressed greys & mixing tones to create contrast. To make a statement, opt for darker/moody colours when co-ordinating walls & floors.

Commix Grey also comes in the colours Anthracite & Ash
